INTRODUCTION

ABOUT US

MISSION STATEMENT

AFRITECH SARL strives to deliver quality products and services to its customers. We aspire to carry a reputation of reliability for developing and delivering products of good quality and timeous delivery, into the marketplace. In pursuit of our goals, we resolve to treat stakeholders, customers and the community with integrity and professionalism.

HISTORY

AFRITECH SARL is a 100% locally owned Congolese company, and proud member of the high live group of companies. AFRITECH SARL was duly constituted in 2012 with the objective to supply critical equipment to the mines, local government, municipalities, and private industrial sectors. Years of experience, intellectual capital and a proven track record differentiate AFRITECH SARL and ensure the utmost piece of mind to the customer and end users. AFRITECH SARL has not only succeeded in establishing itself in the distribution of these products and services, but has also excelled in establishing, and maintaining productive relationships with its customers.

AGENCIES AND DISTRIBUTION AGREEMENTS

AFRITECH SARL has succeeded in securing agencies and/or relationships with several key players in the market place. These include:

1. FILTRATION PRODUCTS

Filter Presses

Afritech filter presses have been designed to withstand over many years. The quality of production and the right choice of filter presses for each type of process determines their life span.

Compared to the competition can boast the largest number of years of work of filter presses.

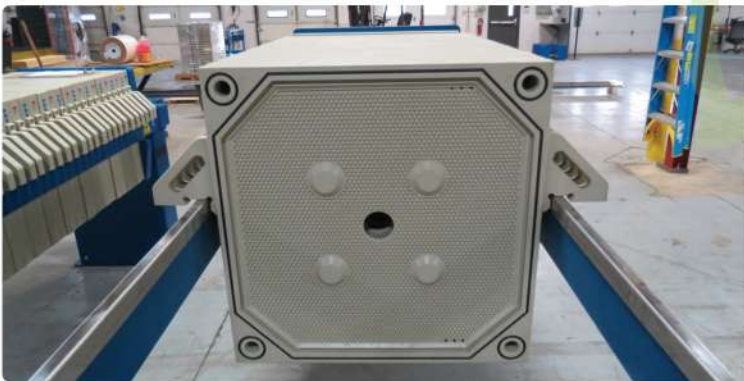

Definitely the maximum resistance provides the filter press with the HIGH BEAM (model DE), able to withstand the maximum thrust loads of the single large cylinder that produces exclusively Afritech only according to its quality parameters.

SOME OF OUR PRODUCTS

FILTER PLATE

The filter plate is one of the main parts of the filter press, and is the key device in the water treatment technology, and plays a dual role of loading filter layer filter and backwash water distribution. According to the different material, the filter plate can be divided into polypropylene filter plate, cast iron filter plate and stainless steel filter plate. According to the different functions, it can be divided into chamber filter plate, Plate frame filter plate, Membrane filter plate, circular high pressure filter plate, cotton cake filter plate etc.

Chemical industry: dye, pigment, caustic soda.
Medicine: antibiotics, growth derivative, organophosphorus, glycosylase
Food: yellow wine, white wine, juice, beverage, beer...
Metallurgy: gold mine, silver mine, copper mine...
Oil refining: white oil, sesame oil, light oil...
Clay: ripe old soil, bentonite, active soil...
Sewage treatment: chemical wastewater, smelting wastewater, electroplating sewage, leather sewage...

SOME OF OUR PRODUCTS

MOTORS & DRIVERS

**300 - Planetary drive for mobile applications**

The 300 Planetary gear motor series are compact and powerful. Their planetary drive train makes them the ideal choice for all the severe duty applications where shock loads and impacts are more the rule than the exception.

The product configuration is highly versatile, due to several options as far as the mounting, the gear layout, the output shaft and the motor interface. All the features are available for each of the 20 finely spaced frame sizes, spanning over the 1000 1.100.000 Nm torque range. Finding the perfect match to any drive problem.

PLANETARY GEAR BOX WITH INTEGRATED KIT MOTOR

Output torque
45 kNm
Gear Ratios
45.2 i

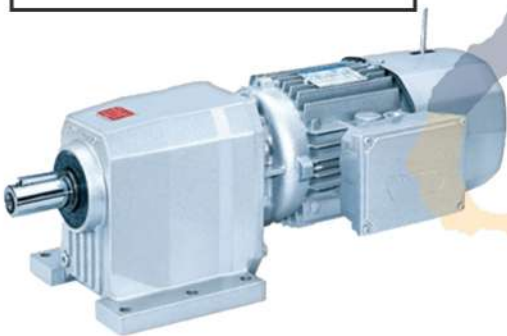

Features

Integrated hydraulic motor
2 - Stage planetary drive
2 - Speed hydraulic motor
Counterbalance travel valve
High pressure relief valves
2 - Speed shift function by external pilot control
Automatically released a parking brake applications where shock loads and impacts are more the rule than the exception. The product configuration is highly versatile, due to several options as far as the mounting, the gear layout, the output shaft and the motor interface. All the features are available for each of the 20 finely spaced frame sizes, spanning over the 1000 1.100.000 Nm torque range. Finding the perfect match to any drive problem

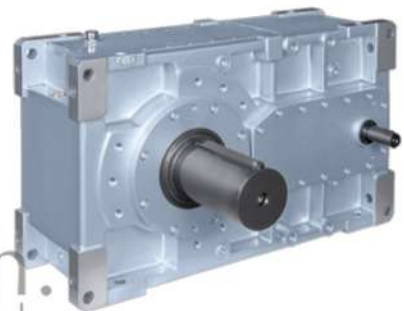

HELICAL GEARMOTORS & GEARBOXES

A comprehensive range of versatile multipurpose industry in-line, shaft-mounted, single and multi-stage, high torque helical gearmotors and gearboxes.

HELICAL GEAR MOTOR

HDP - PARALLEL SHAFT GEARBOX

HELICAL GEAR MOTORF - SHAFT MOUNTED GEAR MOTOR

SINGLE REDUCTION HELICAL GEAR MOTOR

OUR PRODUCTS

TA SERIES - SHAFT MOUNTED REDUCER

300M - PLANETARY GEAR MOTOR

Compact, and yet extremely powerful, are the units of the 300M Planetary gear motor series. Their planetary drive train makes them the ideal choice for all the severe duty applications where shock loadings and impacts are more the rule than the exception. The product configuration is highly versatile, due to several options as far as the mounting, the gear layout, the output shaft and the motor interface. All the features, including the new IEC motor connection with integrated fan, are available for each of the 20 finely spaced frame sizes, spanning over the 1.250 - 1.286.000 Nm torque range. Finding the perfect match to any drive problem is therefore more than a wish, it is something users can safely rely on - always.

OUR PRODUCTS

300 - PLANETARY GEAR MOTOR

The powerful solution to all heavy duty applications Compact, and yet extremely powerful, are the units of the 300 Planetary gear motor series. Their planetary drive train makes them the ideal choice for all the severe duty applications where shock loadings and impacts are more the rule than the exception. The product configuration is highly versatile, due to several options as far as the mounting, the gear layout, the output shaft and the motor interface. All the features are available for each of the 20 finely spaced frame sizes, spanning over the 1.250 - 1.286.000 Nm torque range. Finding the perfect match to any drive problem is therefore more than a wish, it is something users can safely rely on - always.

3/H SERIES - COMBINED GEARBOXES

Performance and technology of the planetary gearboxes with the robustness and reliability of bevel helical gearboxes Africa Techn's 3/H gearboxes combine the high technology, performance and efficiency of planetary gearboxes with the robustness, quality and reliability of bevel helical gearboxes. These planetary/bevel helical combination gear boxes deliver the high transmissible torque of Bonfiglioli planetary 300 Series along with the excellent power transmission characteristics of bevel helical HDO Series and are ideal for applications that demand high power density along with medium-low output speeds. The 3/H range consists of 10 standard catalogue sizes that can transmit up to 1200 kNm of torque. Custom combinations are also available.
